

Ultra Electronics Holdings plc
(“Ultra” or “the Group”)

Annual General Meeting notification and trading update

Ultra, the international defence, security, transport and energy company, today issues a trading update for the period 1 January 2015 to 29 April 2015. Ultra's Annual General Meeting will be held today at 10.00 a.m.

Overall, conditions in Ultra's markets remain as noted on 2 March 2015 in the 2014 preliminary results announcement and expectations for the full year remain unchanged.

Ultra will provide an update on trading and on the group wide initiatives noted in the preliminary announcement, to coincide with its scheduled analyst event on 24 June 2015.

- Ends -

Cautionary Statement:

This interim management statement has been prepared solely to provide additional information to shareholders as a body to meet the relevant requirements of the UK Listing Authority's Disclosure and Transparency Rules. The interim management statement should not be relied upon by any other party for any other purpose.

The interim management statement contains certain forward-looking statements. These statements are made by the directors of Ultra in good faith, based on the information available to them up to the time of the publication of the interim management statement but such forward-looking statements should be treated with caution due to the inherent uncertainties, including both economic and business risk factors, underlying any such forward-looking statements.

This interim management statement has been prepared for the Group as a whole and therefore gives greater emphasis to those matters which are significant to Ultra and its subsidiary undertakings as a whole

Ultra undertakes no obligation to revise or update any forward looking statement contained within this announcement, regardless of whether those statements are affected as a result of new information, future events or otherwise, save as required by law and regulations.

Further information about Ultra:

Ultra Electronics is an internationally successful defence, security, transport and energy company with a long, consistent track record of development and growth. The Group manages a portfolio of specialist capabilities generating innovative solutions to customer needs. Ultra applies electronic and software technologies in demanding and critical environments ranging from military applications, through safety-critical devices in aircraft, to nuclear controls and sensor measurement. These capabilities have seen the Group's highly differentiated products contributing to a large number of platforms and programmes.

Ultra has world-leading positions in many of its specialist capabilities and, as an independent, non-threatening partner, is able to support all of the main prime contractors in its sectors. As a result of such positioning, Ultra's systems, equipment or services are often mission or safety-critical to the successful operation of the platform to which they contribute. In turn, this mission-criticality secures Ultra's positions for the long term which underpins the superior financial performance of the Group.

Ultra offers support to its customers through the design, delivery and support phases of a programme. Ultra businesses have a high degree of operational autonomy where the local management teams are empowered to devise and implement competitive strategies that reflect their expertise in their specific niches. The Group has a small head office and executive team that provide to the individual businesses the same agile, responsive support that they provide to customers as well as formulating Ultra's overarching, corporate strategy.

Across the Group's three divisions, the major market sectors in which Ultra operates are:

Defence: Ultra supplies advanced electronic and electrical systems and equipment to coalition defence forces around the world. The Group innovates to provide battle-winning, specialist capabilities that are tailored to the customer's need and environment. Ultra has world-class capabilities in sonar systems, command & control, platform electrics, surveillance systems and network communications solutions.

Security: Ultra provides highly differentiated systems and capabilities to the broad security, intelligence and cyber market. Ultra has highly specialised capabilities in secure communications, networks and cryptographic equipment, key management systems and surveillance systems and intelligence gathering systems.

Transport: Ultra provides specialist software, systems and equipment for use in mass passenger transport systems. This includes high integrity real-time controls for civil aircraft, advanced IT solutions for modern airports and trackside power equipment for transit rail systems.

Energy: Ultra has a range of safety critical sensors and controls used in existing and new build nuclear reactors. The Group has innovative portable energy sources powered by readily available propane gas.
